List of committees ix

Conference photograph xi

Preface xiii

Plenary talks

Musings about the few-body problem
B. Müller 3

Dyson–Schwinger equations: An instrument for hadron physics
A. Krassnigg and C.D. Roberts 7

Nuclear physics from QCD
S.R. Beane 16

Helium, relativity and QED
G.W.F. Drake 25

QCD and hadron structure: A lattice point of view
K. Jansen 34

Chiral effective field theory for few-nucleon systems
E. Epelbaum 43

M. Poincaré visits Jefferson Lab: Relativistic models of few-nucleon systems
D.R. Phillips 52

Recent developments in few-nucleon systems
A. Kievsky, M. Viviani, L.E. Marcucci and S. Rosati 61

Looking for three-nucleon force effects by Nd scattering at intermediate energies
H. Sakai 70

Electroweak processes in few-body nuclei
J. Carlson 77

Hadronic parity violation: An overview
B.R. Holstein 85

Parity violation with electrons and hadrons
E.J. Beise 93

Astrophysical applications of few-nucleon physics
C.R. Brune 102

Unification of the physics of nucleons and nuclei
U.-G. Meißner 110

A revised formula for 3-body recombination that cannot exceed the unitarity limit
C.H. Greene, B.D. Esry and H. Suno 119

Transport in few-body systems
C. Jaffé and T. Uzer 125

Overview of new facilities for few-body physics
R.G. Milner 132

Few-body aspects of light hypernuclei
E. Hiyama, M. Kamimura, T. Motoba, T. Yamada and Y. Yamamoto 138

Form factors of the nucleon
H. Schmieden 147

Deuteron elastic scattering, photo- and electrodisintegration
R. Gilman 156

Lead parallel session talks

1. QCD and hadron structure

Lattice QCD and nucleon resonances
R.G. Edwards, H.R. Fiebig, G. Fleming and D.G. Richards 167

Structure of baryons in a relativistic quark model
B. Metsch 172

Observing chiral nonanalytic behavior with FLIC fermions
D.B. Leinweber, A.W. Thomas, A.G. Williams, R.D. Young, J.M. Zanotti and J.B. Zhang 177

2. Few body dynamics

Search for three-body force effects in elastic proton–deuteron scattering
N. Kalantar-Nayestanaki 185

EFT for electroweak processes of light nuclei*
T.-S. Park 190

Model independency and three-particle systems
P.F. Bedaque 195

What can we learn from an explicit treatment of the π in the three-nucleon system?
L. Canton and W. Schadow 200

Convergence of the hyperspherical harmonic expansion for four-body scattering problems
M. Viviani, A. Kievsky and S. Rosati 205

Electromagnetic breakup of nuclei with $A = 3$–7
G. Orlandini 210

Three-body interactions in many-body effective field theory
R.J. Furnstahl 215

3. Nuclear forces

The nuclear force problem: Are we seeing the end of the tunnel?
R. Machleidt and D.R. Entem 223

4. Structure of light nuclei and hypernuclei

Effective interaction method for hyperspherical harmonics
W. Leidemann, S. Bacca, N. Barnea and G. Orlandini 231

Probing chiral interactions in light nuclei
A. Nogga, E. Epelbaum, P. Navrátil, W. Glöckle, H. Kamada, U.-G. Meißner, H. Witała, B.R. Barrett and J.P. Vary 236

5. Meson–baryon systems

A realistic baryon–baryon interaction in the SU_6 quark model and its applications to few-baryon systems
Y. Fujiwara, K. Miyagawa, M. Kohno, Y. Suzuki and C. Nakamoto 243

Threshold π^0 photo- and electro-production in a meson-exchange model
S.N. Yang, G.-Y. Chen, S.S. Kamalov, D. Drechsel and L. Tiator 248

6. Relativity in few-body systems

Perspectives of light-front dynamics in few-body systems
C.R. Ji 255

Light-front time picture of few-body systems
T. Frederico, J.H.O. Sales, B.V. Carlson and P.U. Sauer 260

7. Symmetry and symmetry breaking

Symmetries and symmetry breaking
W.T.H. van Oers 267

8. Atomic and molecular systems

Universality in the physics of cold atoms with large scattering length
H.-W. Hammer 275

9. Computational methods

Coulomb–Fourier representation approach to three-body scattering with charged particles
E.O. Alt, S.B. Levin and S.L. Yakovlev 283

10. Exotics

Matter–wave interference, Josephson oscillation and its disruption in a Bose–Einstein condensate on an optical lattice
S.K. Adhikari 289

A replay of few-body reactions in particle cosmology
W.-Y.P. Hwang, T.-S.H. Lee and B.-Q. Ma 294

11. Facility updates

Research perspectives at Jefferson Lab: 12 GeV and beyond
K. de Jager 301

Many-particle dynamics in atomic and molecular physics investigated with the COLTRIMS-technique: New insight into e–e-correlation
H. Schmidt-Böcking, R. Dörner, O. Jagutzki, T. Jahnke, V. Mergel, L.Ph.H. Schmidt, Th. Weber, A. Czasch, Ch. Wimmer, M. Hattass, A. Knapp, M. Schöffler, C.L. Cocke, M. Prior, A. Kheifets, E. Weigold and F. Afaneh 306

Facilities update: Fermilab, Cornell, and GSI
K.K. Seth 314

Japanese facility updates related to few-body physics
K. Hatanaka 319

List of participants 325
